Re: New Product Announcement
LB and UB Series Pushbuttons with Protective Guards

NKK is pleased to announce a new standardized, ready-to-order offering of pushbuttons with protective guards. The ready-to-order LB and UB Series pushbuttons with protective guards come pre-assembled with specified base switch and polyamide rectangular protective guard with cover to provide protection against accidental actuation and environmental intrusions. UB Series option includes illumination and laser etched "ON" symbol. For other available switch variation options, please contact NKK.

See below for breakdown of base part specifications and protective guard description:

Base Part Description	Protective Guard Specification	New Part Number for Switch with Protective Guard
